

**TITLE: Support/Service/Test Engineer**

**The Company:**

MIND Technology, Inc. provides technology and solutions in maritime defense and security, marine exploration and marine survey markets. Headquartered in The Woodlands, Texas, MIND Technology is a NASDAQ listed company with a global presence and key operating locations in the United States, Singapore, Malaysia and the United Kingdom. Its Klein and Seemap units design, manufacture and sell specialized, high performance sonar and seismic exploration equipment.

**Experience:**

- Experience in undersea hardware system development, underwater/marine engineering, and the unique applications of working in a maritime environment.
- Experience with in-water, at-sea testing, or other field testing.
- Excellent written and verbal communications skills.
- Proficient using Electronic Test Equipment.
- Electronics Test/Troubleshooting Experience.

**Job Description:**

- Analyze acoustic data to verify quality assurance standards.
- Plan, prepare and execute sea tests to support production, engineering, and sales goals.
- Interpret electrical, mechanical, and software engineering changes as they relate to sonar system performance.
- Provide solutions to customer support inquiries.
- Present technical information to internal and external entities.
- Hands-on system integration, test, and troubleshooting (simulated, benchtop, and at-sea).
- Up to 15% travel may be required.
- Some off-shore testing may be required.

**Education**

- BS in Systems Engineering, Electrical Engineering, or related engineering field. Advanced degree is a plus.
- Relevant experience may be substituted for education.
